Enterprise Manager™, released in early 1998, is a modular network security software system designed to protect your Windows-based enterprise from the inside, out. Features include real-time monitoring, keystroke and screen recording, usage logging, full inventory/audit, content filtering, remote control, spyware removal and much more! Free evaluation is available at <http://www.toolsthatwork.com/downloads.htm>

Omniquad AntiSpy™ Enterprise Edition is a powerful, out of the box enterprise solution that detects and eliminates spyware from your network. It is designed for effortless remote deployment/administration with centralized management and reporting. It also provides safe and effective protection against all types of Spyware (including Ad-ware, Mal-ware, spy tools and key loggers). Inventory/Audit module is included to ascertain the possible cause of internal spyware. Free evaluation is available at <http://www.toolsthatwork.com/downloads.htm>.
